Search Notes

Dear Scott Beliveau

Please find attached the search results for 10780448. I used the search strategy I emailed to you to edit, which you did. I searched the standard Dialog files, IBM TDBs, IEEE, Proquest, and the internet.

If you would like a re-focus please let me know.

Thank you.

SEARCH REQUEST FORM

If more than one search is submitted, please prioritize searches in order of need.

 Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Media-on-Demand Filing and Reminder system
 Inventors (please provide full names): Arturo A. Rodriguez Dean F. Terding

Earliest Priority Filing Date: 10/20/2000

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

Looking for providing a user with a reminder or notification
 that a Rentable video program (ex PPV, IPPV, VOD, NVOD) will no longer
 be available to rent after a certain time frame

VOD no longer available as of a certain date. rent over next 3 days then expires date reminder

Title: Long-term movie popularity models in video -on- demand systems or the life of an on-demand movie

Abstract: Large scale **video -on- demand** systems require that the

servers offering the video retrieval and playback services are arranged as ...

... only a limited set of the overall available information which changes over time due to **user** interests. If a video is requested which is **not available**, this server contacts the next server in the hierarchy. To decide the size and location...

... the video servers and the location of videos in the hierarchy, the access behaviour of **users** must be considered. Various models for the simulation of **user** behavior (and thus, of the load induced on the video servers) have been presented in...

...a single video server and the load on this single machine. We describe a new **user** behavior model and show that various assumptions made within other models are unrealistic.

Identifiers: **movie** popularity models...

... **video** -on- demand systems...

... **user** access behaviour

Abstract: Providing smooth playback capabilities for video servers, which must support potentially thousands of on-demand **users**, has been an area of active research. From a **user**'s perspective, VCR functions of fast-forward and rewind (FF/Rew), are desirable features in **video -on-demand**. But FF/Rew at n times the regular playback rate requires n times the regular playback bandwidth from architectural components of the video server. Thus, guaranteeing sufficient bandwidth to enable **users** to perform FF/Rew reduces the number of supportable **users** by a factor of n . In this paper, we propose an alternative, effective FF/Rew...

... provides immediate access to full-resolution FF/Rew bandwidth with high probability. When bandwidth is **not available**, the service is either delayed or provided immediately but with a loss in resolution. In...

...guarantees on these QoS metrics results in a significant increase in the number of supportable **users**, when compared to systems in which FF/Rew bandwidth is statically reserved for each **user**. Moreover, a playback-only video server can be extended to provide FF/Rew service by...

Title: EVALUATING THE QUALITY OF ANONYMOUS RECORD LINKAGE USING DETERMINISTIC PROCEDURES WITH THE NEW-YORK-STATE AIDS REGISTRY AND A HOSPITAL DISCHARGE FILE
Author(s): MUSE AG; MIKL J; SMITH PF
Corporate Source: NEW YORK STATE DEPT HLTH, EMPIRE STATE PLAZA, CORNING TOWER, ROOM 772/ALBANY//NY/12237
Journal: STATISTICS IN MEDICINE, 1995, V14, N5-7 (MAR 15), P499-509
ISSN: 0277-6715
Language: ENGLISH Document Type: ARTICLE (Abstract Available)

Abstract: Linkage of same- **person** records across multiple databases relies on high-quality, uniformly available identifying information. These data quality issues become increasingly important when **personal** names are **not available** for record linkage. Using deterministic decision criteria, we linked records from two population-based files in the absence of **personal** names. The sensitivity of anonymous record linkage procedures ranged from 32 to 85 per cent for the two years studied, and the positive predictive value (**PPV**) ranged from 14 to 99 per cent. Decreasing sensitivity and **PPV** were primarily attributed to (1) errors in computerized identifying information and (2) the deterministic decision criteria specified for record linkage. An evaluation of the contribution of **personal** names to the quality of record linkage found no measurable impact.

ISSN: 0884-0997

Company Name: VideoFusion

Product Name: VideoFusion

VideoFusion -- Eddy Award winner VideoFusion creates dazzling QuickTime-movie effects.

... import files in QuickTime, PICS, or PICT formats. It provides three main views of a movie : Storyboard in which movie clips can be organized, Player which is used for viewing movies , and Time which is used for precise, frame-accurate editing. The program includes built-in morphing and provides tools which can change the perspective, position, and orientation of movies to provide a 3-D effect. Features and interface of the program are excellent, but the documentation suffers from a lack of practical examples. It provides features not available elsewhere and is 'a must-have for advanced QuickTime users .' Includes three screen displays. (djd)

...Abstract: The ability to perform morphing, once restricted to high-end graphics workstations, is now widely **available** for desktop computers. We investigated the potential use of morphing for displaying radiographic images.

MATERIALS AND METHODS. Morphing was performed with commercially **available** software (Morph 2.5; Gryphon Software, San Diego, CA) on a Macintosh (Apple Computer, Cupertino...

...and key surfaces were identified on the images to improve the quality of the morph **movie** , a process that took approximately 15 min. The images were then morphed into a continuous Quick Time (Apple) **movie** lasting 5-7 sec. When a sequence contained more than two images, a single **movie** incorporating all the images was created. The intervals between segments of the **movie** were made proportional to the actual time elapsed between the images. Images obtained with different...

...tomography and MR imaging) were also morphed. Three observers judged the quality of the morph **movies** as satisfactory, good, or excellent.

RESULTS. Twenty of 26 **movies** were judged to be of good or excellent quality. The **movie** format allowed the rapid display of multiple images in a concise 5- to 7-sec **time frame** . Moreover, the **movie** allowed the recognition of several simultaneous processes more easily than was possible with static images...

...tomography) proved to be a simple method of superimposing images.

CONCLUSION. Morphing is a readily **available** and easily learned

technique for displaying serial studies. The **movie** format is a more interesting, intuitive, and concise summary of events than can be provided...

Lawmaker's House Grabs Its Share of the Limelight; Movies : Bob
Hertzberg's 1960s-style home has caught the eye of filmmakers, who have
paid...

...ABSTRACT: he became a state assemblyman, Bob Hertzberg thought it would be fun, fun, fun to **rent** out his San Fernando Valley home as a set for **movies** like an upcoming TV miniseries on the Beach Boys. "It totally turns your life upside-down," said Hertzberg. To accommodate the **movie** makers, the state politician and his family had to move to a hotel and as a result, Hertzberg said, he may drop the house from location listings. The **movie** people say they were not even aware of Hertzberg's elected position; they just liked the look of the 1960s-era house. They say it fit the **time frame** of the film, which traces the beginnings of the Beach Boys from their early days...

Abstract (Basic):

... The availability of answer relevant to the input questions is
determined. When specific answer is **not available**, answer from the
user is collected. When answer is available, the relevant change is
indicated...

... the correct answers is computed based on the pay-off formula.
When particular answer is **not available** in the database, the
question is stored. The question list is produced after completing the
...

...database accessing system in computer network to provide query based
answers for auctioning, traveling service, **movies**, stock market,
advertising, grocery service and other related services...

...SPECIFICATION at the required bit-rate for each video program.

In such a system, when a **user** selects a **movie** that is **not available** on disk, it would be necessary for the video server to load the movie from...

...the movie to the disk subsystem greatly increases the response time as observed by the **user**. This increased response time is **undesirable**.

Therefore, the invention seeks to provide for a digital...304, depending on where the initial segment of the video is preloaded. If the complete **movie** is **not available** in disk subsystem 302 at the time the movie is selected, the remainder of the...

...disk subsystem 302 by the time it was required for playback or dispatch to the **user**.

Thus, segments of all of the movies in tape library 300 may be loaded either...
